

BRIAN GITHINJI WANJOHI – FULL STACK DEVELOPER

CONTACT

Email: briangithinji2022@gmail.com

WhatsApp: +254 745 506 462

Location: Kerugoya, Kenya

GitHub: <https://github.com/githinji12>

Portfolio: <https://githiniwanjohi.netlify.app/>

PROFESSIONAL SUMMARY

Full Stack Developer with experience building modern web applications, business management systems, educational platforms, and AI-powered solutions using React, Next.js, PHP, MySQL, and Supabase. Passionate about creating scalable digital products with exceptional user experiences and clean software architecture.

TECHNICAL SKILLS

Frontend

React

Next.js

JavaScript

TypeScript

TailwindCSS

Backend

PHP

Supabase

REST APIs

Firebase

Databases

MySQL

PostgreSQL

Tools

Git

GitHub

Postman

Figma

VS Code

Deployment

Vercel

Netlify

HostAfrica

Github

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | 2022 – Present

React, Next.js, PHP, MySQL projects

Business systems

Educational platforms

API integrations

ICT Attaché / ICT Support Assistant | White Rhino Legends Hotel | May 2025 – August 2025

Technical support

Network troubleshooting

Hardware maintenance

Systems administration

FEATURED PROJECTS Omba Platform

React-based spiritual learning platform focused on educational content delivery, user engagement, and accessibility.

Technologies: React, Tailwind CSS, Firebase

Keywords: web application, content management, user experience, responsive design

Elimu AI

AI-powered learning platform providing personalized education support, curriculum assistance, and adaptive learning experiences using AI APIs.

Technologies: Next.js, Supabase, AI APIs

Keywords: artificial intelligence, edtech, personalized learning, full-stack development

Stream Kenya

Responsive media streaming platform for Kenyan digital content with modern UI and optimized performance.

Technologies: React, Next.js

Keywords: media streaming, frontend development, responsive web design, content delivery

Zaina Beauty Shop System

Business management system for inventory tracking, sales processing, and customer data management for retail operations.

Technologies: PHP, MySQL

Keywords: database systems, inventory management, sales system, CRUD application

AI Task Manager

Web-based task management application with AI-based task suggestions, drag-and-drop functionality, and local storage persistence. Technologies: JavaScript, React, LocalStorage

Keywords: productivity tool, task management, AI integration, frontend development

SautiWatch GBV Reporting System

Anonymous reporting platform designed to support safe reporting of gender-based violence cases using AI assistance and cloud backend services.

Technologies: Web Technologies, AI APIs, Cloud Services

Keywords: social impact system, anonymous reporting, AI integration, civic technology

Weather App

Real-time weather forecasting application using OpenWeather API with dynamic data rendering and responsive UI.

Technologies: React, OpenWeather API

Keywords: API integration, frontend development, real-time data, web application

Todo App

Simple task management application with persistent storage using localStorage and responsive UI design.

Technologies: JavaScript, HTML, CSS

Keywords: CRUD application, local storage, frontend development, productivity tool

ACHIEVEMENTS

Built 10+ production-ready web applications

Developed full-stack business systems using PHP and MySQL

Designed modern responsive interfaces using React and Next.js

Integrated external APIs and cloud services

Delivered projects for educational and business organizations

EDUCATION

Bachelor of Science in Information Technology (In Progress) at Karatina University Expected Graduation: 2026

Focused on software development, systems design, databases, networking, and modern web technologies.

Key areas of study include:

Software Engineering

Database Systems (MySQL, relational design)

Web Development (React, Next.js, PHP)

Computer Networks

Systems Analysis and Design
